

Nene Facility Management Services

Nene

Facility Management Services

In the area of supply chain management many companies are looking for ways to maintain and increase efficiencies within their warehouse and storage facilities, whilst adhering to ever increasing legislation.

To ensure that companies can meet their stringent targets Nene has gathered together a team of qualified professionals who are able to offer both commercial and practical assistance.

This help is administered through our Facility Management Services Department, who are able to offer:

- A full building facility management service.
- Supply all office and warehouse requirements.
- Administer a warehouse safety inspection scheme aimed at Racking/Shelving and Material Handling Equipment.
- Safety Systems for building management.
- Training in good warehouse practices.
- Experienced personnel to cover all aspects of electrical, plumbing and heating requirements for both industrial and retail facilities.

This division of Nene will tailor a management facility package around your exact needs.

GAP
GAP Warehousing Services Ltd

Linked to this specialist support our Property Division will supply a retail or industrial unit, arrange for it to be fitted out and staffed and will then operate it in line with your requirements and to your specifications through our own logistics and distribution company GAP Warehousing Services Ltd.

Please feel free to ask for more information about GAP Warehousing Services Ltd.
