

NEW!

**Turn Standard
Single-Deep Frames**

**Into Two-Sided
PICKING SOLUTIONS!**

This one-of-a-kind deck turns standard single deep frames into two-sided picking solutions. The 3" overhang in tandem with the sloped design provides both a clear view and easy access to manually handled boxes or bins. Best of all the design allows for an extra beam level over five or six levels, meaning more storage capacity than standard flat wire decks. As with all Nene products you can count on a wide selection of sizes, capacities, and quality.
