Racking Maintenance

Racking Maintenance

To minimise your downtime and maximise your return on investment, our UK-wide network of SEMA-accredited experts will take care of your racking maintenance, ensuring your racking is not only fit-for-purpose but safe as well.

More than 80% of rack damage happens in the first two metres off the ground. The front face of the upright and first three braces are always the most vulnerable. The uprights of the ends of the aisle are the most prone to damage. Take a look at our barrier systems to help protect your storage system.

Nationwide Coverage

With over 200 installation teams covering the UK and Ireland, we can deliver a true one-stop-shop solution for your multisite operation, no matter the size or scope.

Fast, Efficient Service

Thanks to our huge stockholding, replacement parts can be with you the next day. Our emergency 'make-safe' service guarantees a fix within 24 hours. All our installation crews are SEMA / SEIRS certified, CSCS and Safe Contractor Accredited, meaning your business is in the best hands.

Minimal Downtime

With a managed maintenance programme from Nene, you can minimise your downtime safe in the knowledge that all repairs and maintenance will be carried out to the highest standard in super-quick time.

All Racking Systems

We stock nearly 30 manufacturers, as well as old, superceded systems. We also offer a number of recycling options where we re-use good parts or refurbish components wherever possible, minimising your costs and ensuring maximum mileage from your racking investment.

On Time and On Budget

Whether problems are caused by accidental damage or simple wear-and-tear, our team of installers will carry out necessary repairs to an agreed schedule or as-and-when required, whichever option works best for you. All labour and components are fully costed to a previously agreed schedule for no surprise expenditure.

Manage Disposal

We provide a range of environmental options too, including disposal of damaged and surplus components, taking another time-consuming task off your hands.
