# Racking Repairs

With over 45 years of experience providing market-leading warehouse and racking maintenance and support, minimising downtime is our speciality.

## Fast, Expert Response

Within 24 hours of the initial damage report, a member of our SEIRS qualified, highly experienced team will be on site organising a 'Make Safe Plan' ready to get your business back on track. By producing a comprehensive damage report, you will know exactly what needs repairing and the most cost-effective and efficient way of doing this.

## Replacement Parts

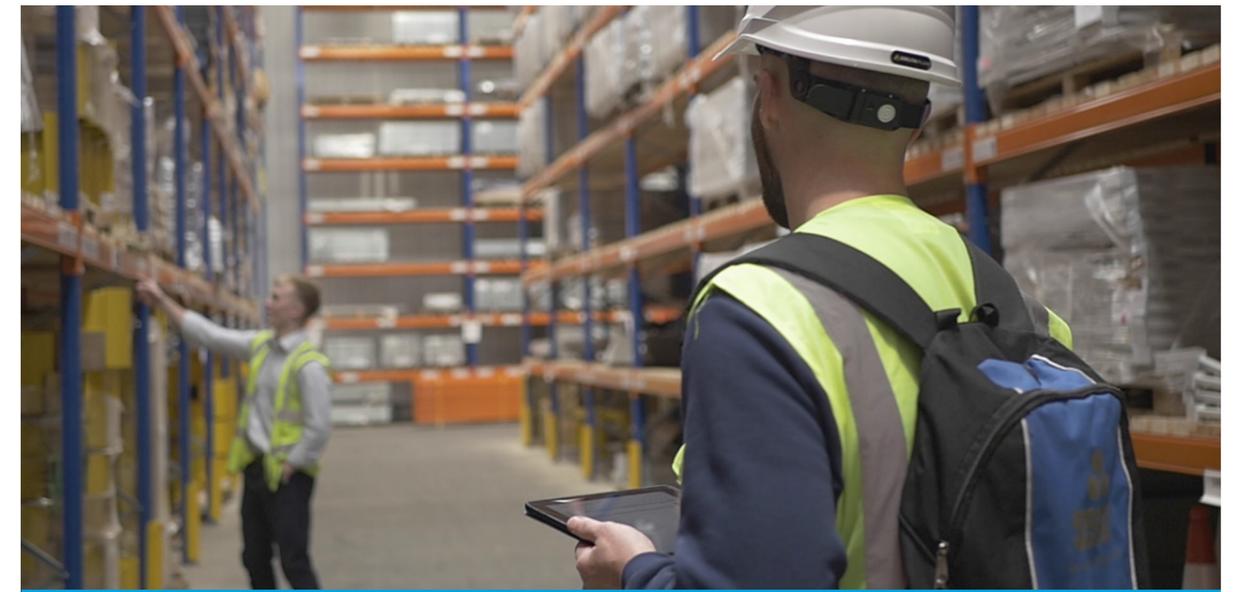

Thanks to our vast stock-holding, any required replacement parts are sent directly to your site quickly and efficiently, ensuring a swift resolution. Our range of disposal and recycling options also take care of another potential headache for you.

## Call-out Service

In more challenging situations, we provide a UK-wide racking call-out service with our team of SEMA-approved racking inspectors carrying out thorough risk assessments. Using a simple traffic light colour coding system, this helps you to prioritise the areas requiring immediate action.

## Maintain Your Racking

The maintenance of pallet racking is a skilled job and should only be carried out by qualified and experienced teams. It is not advised that pallet racking is built, moved or adjusted by any individual without the necessary level of experience or relevant qualifications.

Furthermore, it is always advisable that a method statement and full risk assessment is carried out prior to any installation projects or maintenance works. At Nene, all of our installation teams are fully certified and are on hand to help.

## Ongoing Maintenance

Our asset management plan ensures the ongoing maintenance of your racking solution. Regular fully-managed, quality-controlled racking inspections and checks, alongside fully-costed recommendations on repairs, or preventative maintenance help prolong the life of your storage solution.
