Turnkey Solutions

Turnkey Solutions

From idea to installation, we have the knowledge, expertise and experience to deliver your complete warehouse solution.

Having worked with some of the biggest names in the market and delivering turnkey projects across the UK and Europe, our expert project managers are fully equipped to supply a complete warehouse fit out.

Once you have decided to work with us, you will be introduced to your dedicated project manager, who will consult with you all the way through the project, to ensure you receive a seamless, efficient and quality customer experience.

Turnkey solutions can include...

- Warehouse Pallet Racking Systems
- Pallet Shuttle Systems
- Shelving Systems
- Cantilever Racking
- Partitioning for Factory or Offices
- LED Warehouse Lighting Systems
- Office and Emergency Lighting
- Suspended Ceilings
- Stud Walls including Fire Rated Walls
- Air Conditioning and Ventilation Systems
- Fire Detection Systems
- Labelling and Floor Marking/Painting

Lack of warehouse space and new land becoming available for new warehouse schemes is a key issue facing the UK warehouse sector at the moment.

Consultation and Design

Following your consultation and full technical site survey, our highly experienced design engineers will either work with you and your project manager to put together 2D CAD layouts, or work with existing drawings, whichever is required to meet your needs. From this, we will then work out the most efficient and time effective delivery for your installation.

Safety and Compliance

With SEMA approved and certified installers, site specific risk assessment and methodologies, and up to the minute health and safety documentation, you can be assured that your installation is safe and regulation compliant. We are also able to conduct damaged racking surveys, which identify any work that needs to be undertaken, and what is required to comply with SEMA guidelines.

Aftercare and the Environment

For added peace of mind, we offer a comprehensive contract maintenance service. With an annual or 'as and when' service, environment and recycling options, we can work together to keep your installation in great shape and be environmentally considerate. This forms part of the aftercare promise and servicing we are proud to deliver.
